

RIO STOCK TRADING GBP

1 April 2024

MANAGER COMMENTS

Stock Trading GBP gained 0.97% during March and this investment has a perfect trading record having filed three consecutive gaining months this year. The gains reported over the three- and five-year periods were 80.06% and 113.29% respectively and members invested since launch have seen a net return of 235.16%. The risk/reward ratio is also very attractive, analysed over the past 24-month period this is 8.14:1. The risk/reward calculation is a division of the net profit (the reward) by the price of the maximum risk taken.

The Market - Data released recently shows that retail spending came in better than expected in January and February of this year. This helped allay fears of a sustained recession, and sparked murmurings of improved investor sentiment. Plus, when you consider that many economists think we are set for interest rate cuts sooner rather than later, this as inflation levels are coming down, I'm not surprised to see the FTSE 100 edging upwards. There are a few UK stocks which have fallen in value and at present offer a unique opportunity, they represent a strong buying case, as some are undervalued.

INVESTMENT OBJECTIVE

RIO Stock Trading GBP is a high-risk trading platform through which RIO can invest in currency, UK equities, and the commodity market. The account may also invest in other high-risk traded securities, where the potential gains are deemed to be in line with the risk-reward ratio, at the discretion of the investment manager. The trading strategy favours a midterm investment of between 2-3 years due to the expected short-term volatility.

As an active investment specialist, market volatility can create a prime investment opportunity and RIO expects further volatility, especially against the current backdrop. Geopolitical tensions are at fever pitch as the effects of Russia's invasion of Ukraine make negotiations tense. The knock-on effects of this are reflected in the stock values of UK-listed companies.

RIO Stock Trading GBP will focus predominantly on trading those entities listed on the FTSE 100 index and has already identified several trading opportunities.

Please note that this investment is only suitable for those prepared to accept the additional risk, in exchange for the potential reward.

INFORMATION

NAV	335.16
Launch Date	June 2016
Investment Manager	William Gray
Currency	GBP
Minimum Investment	10,000

CUMMULATIVE PERFORMANCE (Five Years)

This document is not an offer of investment. Subscriptions for shares can only be made on the basis of the current literature and The RIO Club operates strictly on a referral only basis. Past performance is not a guide to future performance and there can be no assurance that the investment objective(s) will be met. The value of investments and the income from them can fall as well as rise and is not guaranteed. Investors may not get back the full amount invested. This investment is high risk and is very likely to experience volatility, it is designed for members who accept a high level of risk for a potential high gain over the mid to long term. Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Current tax levels and reliefs may change and depending on individual circumstances this may affect the investment return. For further information please refer to the terms and conditions.
