

# RIO STOCK TRADING GBP

1 July 2024

## MANAGER COMMENTS

Stock Trading GBP posted a return of 0.18% during June, in comparison the accounts benchmark, the FTSE 100, fell 1.34%. I am proud to say that this investment continues with a perfect trading record this year, having filed six consecutive gaining months. The returns reported over the three- and five-year periods are 66.32% and 119.74%, respectively. I am happy too with the net return of 238.93%. The risk/reward ratio is also very attractive, analysed over the past 24-month period, this is 25.84-1. The risk/reward calculation is a division of the net profit (the reward) by the price of the maximum risk taken. A risk-reward ratio of 4 is considered reasonable, so above 8 is excellent; but 25.84-1 certainly sets this investment in a class of its own.

The Market - Revised official data on Friday showed the UK economy exiting the recession faster than expected in Q1 of this year, the new figures in fact indicate that Britain is witnessing the fastest economic growth since 2021, however, the market remains poised for the upcoming election. Economic growth has become a key issue in the upcoming election, as the country has emerged from COVID with lagging growth seen in the UK over the last few years. That said, compared with other G7 nations, the UK saw the strongest growth last quarter.

## INVESTMENT OBJECTIVE

RIO Stock Trading GBP is a high-risk trading platform through which RIO can invest in currency, UK equities, and the commodity market. The account may also invest in other high-risk traded securities, where the potential gains are deemed to be in line with the risk-reward ratio, at the discretion of the investment manager. The trading strategy favours a midterm investment of between 2-3 years due to the expected short-term volatility.

As an active investment specialist, market volatility can create a prime investment opportunity and RIO expects further volatility, especially against the current backdrop. Geopolitical tensions are at fever pitch as the effects of Russia's invasion of Ukraine make negotiations tense. The knock-on effects of this are reflected in the stock values of UK-listed companies.

RIO Stock Trading GBP will focus predominantly on trading those entities listed on the FTSE 100 index and has already identified several trading opportunities.

Please note that this investment is only suitable for those prepared to accept the additional risk, in exchange for the potential reward.

PERFORMANCE	YTD	1m	6m	1Yr	2Yr	3Yr	5Yr	S/L
	2.87	0.18	2.87	8.25	29.71	66.32	119.74	238.93

## CUMMULATIVE PERFORMANCE (Five Years)

This document is not an offer of investment. Subscriptions for shares can only be made on the basis of the current literature and The RIO Club operates strictly on a referral only basis. Past performance is not a guide to future performance and there can be no assurance that the investment objective(s) will be met. The value of investments and the income from them can fall as well as rise and is not guaranteed. Investors may not get back the full amount invested. This investment is high risk and is very likely to experience volatility, it is designed for members who accept a high level of risk for a potential high gain over the mid to long term. Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Current tax levels and reliefs may change and depending on individual circumstances this may affect the investment return. For further information please refer to the terms and conditions.
