1 September 2022

## MANAGER COMMENTS

RIO Stock Trading GBP suffered a loss of 0.31% in August which detracts little from the fact that it has produced an exceptional gain since the start of the year, up 17.65%. The FTSE, in comparison, registered a loss of 1.36% over the same period. Looking back to last year, this account had greatly benefited from holding a larger cash position throughout the later part of 2021 (a safety stance) in preparation for the arrival of a stock market meltdown, which I had forecasted. This is all positive, as is the historical performance, the account has produced very impressive results with returns of 23.25%, 60.38%, 75.07%, 76.85% and 131.48% for the past 1, 2, 3, 5 and 6 year periods, respectively.

In stark contrast, over the same period, stock market sell-offs have literally wiped-out all the gains of most equity based mutual funds, and left the few remaining ones with minimal gains, most of which barely cover management fees! Any investor who had invested in the mainstream equity products would have suffered at the start to the year, and today, at best, has been through a rough year. Most mutual fund managers had simply watched their 2020/21 gains evaporate with the collapse of global stock markets.

## INVESTMENT OBJECTIVE

RIO Stock Trading GBP is a high-risk trading platform through which RIO can invest in currency, UK equities, and the commodity market. The account may also invest in other high-risk traded securities, where the potential gains are deemed to be in line with the risk-reward ratio, at the discretion of the investment manager. The trading strategy favours a midterm investment of between 2-3 years due to the expected short-term volatility.

As an active investment specialist, market volatility can create a prime investment opportunity and RIO expects further volatility, especially against the current backdrop. Geopolitical tensions are at fever pitch as the effects of Russia's invasion of Ukraine make negotiations tense. The knock-on effects of this are reflected in the stock values of UK-listed companies.

RIO Stock Trading GBP will focus predominantly on trading those entities listed on the FTSE 100 index and has already identified several trading opportunities.

Please note that this investment is only suitable for those prepared to accept the additional risk, in exchange for the potential reward.

## INFORMATION

NAV	262.85
Launch Date	June 2016
Investment Manager	William Gray
Currency	GBP
Minimum Investment	10,000

PERFORMANCE	YTD	1m	6m	1Yr	2Yr	3Yr	5Yr	S/L
	17.65	-0.31	14.06	23.25	60.38	75.07	76.85	162.85

## CUMMULATIVE PERFORMANCE (Five Years)

This document is not an offer of investment. Subscriptions for shares can only be made on the basis of the current literature and The RIO Club operates strictly on a referral only basis. Past performance is not a guide to future performance and there can be no assurance that the investment objective(s) will be met. The value of investments and the income from them can fall as well as rise and is not guaranteed. Investors may not get back the full amount invested. This investment is high risk and is very likely to experience volatility, it is designed for members who accept a high level of risk for a potential high gain over the mid to long term. Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Current tax levels and reliefs may change and depending on individual circumstances this may affect the investment return. For further information please refer to the terms and conditions.

## ASSET ALLOCATION (%)

## VOLATILITY & RISK (24 Months)

Annualised Volatility	16.60%
Return for Period	60.38%
Best Monthly Return	15.16%
Worst Monthly Return	-3.23%
Risk / Reward Ratio	18.70:1

The risk/reward calculation is a division of net profit (the reward) by the price of your maximum risk. Any investor should determine their acceptable risk, but it is always best to be more conservative with risk than aggressive with reward.
