

RIO STOCK TRADING USD

1 January 2025

MANAGER COMMENTS

RIO Stock Trading USD gained 0.29% during December, this positive return recorded while the accounts benchmark, The DOW Jones, fell -5.27%. I was able to avoid the downside as I had taken action early in the month to sell 70% of the equities held, this had presented me with the ideal opportunity to reacquire the stocks at a far lower book cost.

The current asset allocation of RIO Stock Trading USD underlines that this is the largest exposure to equities since inception. The equities held have a combination of promising technical indicators and strong fundamentals and as such the account is well positioned for January.

Market Comment - The uncertainty surrounding President-elect Trump's policies has created volatility and with that the opportunity to deploy capital. There is potentially significant room to see a strong gain in early 2025.

INVESTMENT OBJECTIVE

RIO Stock Trading USD is for the seasoned and experienced investor only; ideally an investor who already has a sizeable portfolio. It is not suitable for, nor aimed at, novice investors. The product was created at the request of members who have portfolios with The RIO Club valued in excess of \$2 million.

This is a very high-risk investment which is focused predominately on equities; it is designed for those who can accept a higher degree of risk in exchange for the possibility of a higher return. Given that it is a higher risk product, it is not for those looking for a simple steady or constant return; it is in fact expected and accepted that an investment of this nature would be very likely to see volatility.

The above being so, RIO Stock Trading USD is not for a cautious investor, nor is it for members who cannot accept the potentially substantial swings in the value of their investment. The aggressive trading could substantially reward the right type of member; a person who is ready to accept additional risks.
