MANAGER COMMENTS

RIO Stock Trading USD lost just 0.98% in March, this as the Dow Jones fell 3.83% and the NASDAQ collapsed almost 10%, again it was my proactive actions that had limited the downside. As we moved through the month, I sold several equity positions prior to the stock market sell-off which tanked the markets. The strategy of moving capital to safety has yet again been proven to be prudent.

The weighting to equities at the end of February was 37.73% and today it stands at 20.13%, the remainder held in cash ready to buy back in to any further correction. Stock Trading USD is well placed as we enter April, I had reacquired over half of the stocks sold at month end with each being bought at a lower book cost, and I am almost certain that I will be able to add to this in coming days. I will take full advantage of this sell-off to reposition. The equities currently held have a combination of promising technical indicators and strong fundamentals.

The Market - Volatility is unlikely to taper off as we enter April so the stock market sell-off is, in my opinion, not over yet. That said, there would certainly be relief on any positive news that the tariffs would be suspended or even better reduced. Without this the market's upside is capped.

INVESTMENT OBJECTIVE

RIO Stock Trading USD is for the seasoned and experienced investor only; ideally an investor who already has a sizeable portfolio. It is not suitable for, nor aimed at, novice investors. The product was created at the request of members who have portfolios with The RIO Club valued in excess of \$2 million.

This is a very high-risk investment which is focused predominately on equities; it is designed for those who can accept a higher degree of risk in exchange for the possibility of a higher return. Given that it is a higher risk product, it is not for those looking for a simple steady or constant return; it is in fact expected and accepted that an investment of this nature would be very likely to see volatility.

The above being so, RIO Stock Trading USD is not for a cautious investor, nor is it for members who cannot accept the potentially substantial swings in the value of their investment. The aggressive trading could substantially reward the right type of member; a person who is ready to accept additional risks.
