

# RIO STOCK TRADING USD

1 September 2025

## MANAGER COMMENTS

RIO Stock Trading USD gained 1.14% during August. The market fell back at the start of August had allowed me to selectively add to the accounts' equity positions. As the month closed, I had raised the equity weighting to 46%, September can be volatile, but the stocks currently held represent good value. Today I remain optimistic about equities (selectively of course) in the next 12 months; most members are focused on building resilient portfolios through diversification to ride through the near-term uncertainties.

The market - The first week of September will have just four days of trading this as US investors and fund managers weigh up the crucial jobs report, this being the first paper since July's dramatic revisions and the abrupt change at the top of the Bureau of Labour Statistics, which surprised investors.

The August jobs report's importance for investors is downstream of its importance for the Federal Reserve. Just who will be serving on the Federal Reserve's Board of Governors by the end of the week ahead is far from certain.

## INVESTMENT OBJECTIVE

RIO Stock Trading USD is for the seasoned and experienced investor only; ideally an investor who already has a sizeable portfolio. It is not suitable for, nor aimed at, novice investors. The product was created at the request of members who have portfolios with The RIO Club valued in excess of \$2 million.

This is a very high-risk investment which is focused predominately on equities; it is designed for those who can accept a higher degree of risk in exchange for the possibility of a higher return. Given that it is a higher risk product, it is not for those looking for a simple steady or constant return; it is in fact expected and accepted that an investment of this nature would be very likely to see volatility.

The above being so, RIO Stock Trading USD is not for a cautious investor, nor is it for members who cannot accept the potentially substantial swings in the value of their investment. The aggressive trading could substantially reward the right type of member; a person who is ready to accept additional risks.

He has actively traded stocks, bonds, currencies and commodities with some degree of accuracy. A proven track record combined with all the advantages of an experienced multi asset fund manager.

PERFORMANCE	YTD	1m	6m	1Yr	2Yr	3Yr	5Yr	S/L
	4.96	1.14	1.30	21.96	61.39	90.06	199.47	263.23

## CUMMULATIVE PERFORMANCE (Since Launch)

This document is not an offer of investment. Subscriptions for shares can only be made on the basis of the current literature and The RIO Club operates strictly on a referral only basis. Past performance is not a guide to future performance and there can be no assurance that the investment objective(s) will be met. The value of investments and the income from them can fall as well as rise and is not guaranteed. Investors may not get back the full amount invested. This investment is high risk and is very likely to experience volatility, it is designed for members who accept a high level of risk for a potential high gain over the mid to long term. Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Current tax levels and reliefs may change and depending on individual circumstances this may affect the investment return. For further information please refer to the terms and conditions.

## ASSET ALLOCATION (%)

## VOLATILITY & RISK (24 Months)

Annualised Volatility	14.47%
Return for Period	61.39%
Best Monthly Return	11.20%
Worst Monthly Return	-0.98%
Risk / Reward Ratio	60.17:1

The risk/reward calculation is a division of net profit (the reward) by the price of your maximum risk. Any investor should determine their acceptable risk, but it is always best to be more conservative with risk than aggressive with reward.
