MANAGER COMMENTS

RIO Stock Trading USD gained 3.27% during October, this its highest monthly gain since March. During October, I sold four positions banking gains; stocks sold included Datadog Inc., bought on the 4th and sold on the 11th. Boeing stock was acquired on the 16th and sold on the 23rd, this trade banking a gain of over 3%. I also purchased Wheaton Precious Metals Corp. stock on the 17th and closed the position on the 23rd with a gain of over 8%. The most significant election trade I have placed during the month was Donald Trump Media which was bought on the 23rd and sold on the 29th with a gain in excess of 30%. The market conditions created a powerful uptrend, which I was able to both trade and capitalize on. Importantly the equities currently held have promising technical indicators and strong fundamentals.

In the coming weeks, this investment will continue to adjust its asset weightings to exploit the significant investment opportunity surrounding the final run-up to the US election. As we move into November, it's very likely that uncertainty will build, and markets don't like uncertainty. Conversely, this uncertainty presents an investment opportunity for a seasoned fund manager. Simply put, if you've done your research—and we have—it's possible to bank strong gains!

INVESTMENT OBJECTIVE

RIO Stock Trading USD is for the seasoned and experienced investor only; ideally an investor who already has a sizeable portfolio. It is not suitable for, nor aimed at, novice investors. The product was created at the request of members who have portfolios with The RIO Club valued in excess of \$2 million.

This is a very high-risk investment which is focused predominately on equities; it is designed for those who can accept a higher degree of risk in exchange for the possibility of a higher return. Given that it is a higher risk product, it is not for those looking for a simple steady or constant return; it is in fact expected and accepted that an investment of this nature would be very likely to see volatility.

The above being so, RIO Stock Trading USD is not for a cautious investor, nor is it for members who cannot accept the potentially substantial swings in the value of their investment. The aggressive trading could substantially reward the right type of member; a person who is ready to accept additional risks.
