

RIO SILVER LINING GBP

1 January 2023

MANAGER COMMENTS

RIO Silver Lining GBP is the latest addition to the RIO product range and provides an alternative to the original RIO Silver Lining which is valued in USD. It has produced a good first quarter with a net return of 3.10%.

The potential for silver to rally in the coming years is undoubtedly there. The metal is currently at £19, a six-month high and equals the high seen for the year. The massive push of green energy certainly bodes well for the shiny metal. In today's market, very few assets, let alone a commodity, are trading at such a massive discount to their all-time high. This statement is amplified when you consider currency debasement, which is accelerating.

INVESTMENT OBJECTIVE

To provide a secure alternative to that offered by the lackluster standard silver investment products and or funds offered by the investment industry. The aptly named "Silver Lining" holds 100% of its Bullion assets in unencumbered and uncirculated one kilo Silver bars, officially circulated by several government mints.

To date the account has achieved its target and since launch it has outperformed the statistical return of untraded physical silver (buy and hold strategies). Statistical analysis confirms that the silver to gold ratios favours silver, the fact that it remains technically under bought in current market being another plus. Silver does not offer the same level of security that gold does due to its price volatility. However, the constant fluctuations result in more opportunities to buy and sell at profit, making it a more speculative investment. Owning physical silver bars and silver coins can offer an effective way of diversifying an individual's investment portfolio, given that it is becoming widely considered that we are entering an overvalued stock market condition today. It is ideal for members wishing to spread risk whilst providing additional protection against other investments.

ASSET ALLOCATION (%)

VOLATILITY & RISK (Since Launch)

Annualised Volatility	0.00%
Return for Period	3.10%
Best Quarterly Return	3.10%
Worst Quarterly Return	3.10%
Risk / Reward Ratio	3.10:1

The risk/reward calculation is a division of net profit (the reward) by the price of your maximum risk. Any investor should determine their acceptable risk, but it is always best to be more conservative with risk than aggressive with reward.
